BUSINESS CHEERFUL

Never Better Have the Times Been Better, Asserts Famous Inventor in Florida

By JAMES I. KILLGILLEN
(Special Editor, Boston Evening American)

Fort Myers, Fla., Feb. 10.—Thomas A. Edison is an optimist in America. Business prospects seem all right, he says, and a very small part of the country's real resources are being utilized. He says that the country is not using more than 5 per cent. of its resources. He says that the country is not using more than 5 per cent. of its resources. He says that the country is not using more than 5 per cent. of its resources.

HEAR OF HOOVER AID ON MUSCLE SHOALS

Washington, Feb. 19 (AP).—The money that President Hoover, while secretary of commerce, attempted to aid in solving the long-standing problem of Muscle Shoals for an effort to reconcile the divergent views of the power and chemical groups was heard today before the Senate labor committee.

The information was received in the form of a letter written by Claudius H. Huston, now chairman of the Republican National Committee, to J. Edgar Hoover, chairman of the executive committee of the Executive Order Improvement Association, on July 20, 1927.

The letter said Huston and Washington in the fall of 1925 had an attempt to bring the power and chemical groups together and we made a formal failure.

It added that Huston, former president of the Tennessee River Improvement Association, came with Mr. Hoover, attempted to do so, and that Mr. Hoover, in an effort to bring these interests together through them, failed.

Young is a former chairman of the Radio Corporation of America.

Photo shows the destruction of the summeroff monastery found of 600 years ago by St. Sergius. For years it was one of the most important and richly endowed institutions in Russia. More than 500 workmen are employed demolishing the huge structure. Each one has picked himself to carry away one stone from the demolished structure. (A. P. photo.)

"You'll be
ALL RIGHT
at a
Statler"

What better assurance can a traveler have than that he's going to a hotel where he'll be comfortable, well-served, and where he'll get more than his money's worth? That assurance is his—and yours—at a Statler.

You can be sure of the up-to-date attractiveness of your room—and of such comforts as radio which awaits the turn of a switch, running ice water, bed-head reading lamp, your own private bath, a morning paper under the door when you wake; and excellent restaurants, in a variety which ranges from formal service to a lunch-room or cafeteria.

You can be sure of a fair rate—which is posted, by the way, in your room, and which doesn't change with the flow of business.

You can be sure of "Statler Service," which is built on long and careful training of employees in courtesy and interested helpfulness. Every Statler guest's satisfaction is guaranteed.

Depend upon the experience of thousands of travelers who'll tell you, if you inquire in a Pullman, or a ship's lounge, or wherever travelers congregate, that "you'll be all right at a Statler."

PROGRAM OF VARIETY BY KAROLIK

A worthy cause such as the benefit concert given at Symphony Hall for the Prerogative Preventionist at Mattapan must have been highly satisfactory to its sponsor, the Boston Tuberculosis Association, and to Maxim Karolik, tenor.

For the most part the program consisted of songs by Russian composers with a group of French and Italian songs. Paul Allen, local American composer, was represented by "Uncle Sam's Song" from the opera, "The Last of the Mohicans." Mr. Allen accompanying on the piano.

Karolik had little opportunity for displaying much of the dramatic element in his songs until the third group. Here he found abundant opportunity for story-telling in songs, especially in "The Star of the Rising Sun," by the same composer, was vividly portrayed, while the touching sadness of "Mourning's Little Star, Where Art Thou," was fittingly rendered.

For the closing numbers Mr. Karolik sang songs by Chopin, Tchaikovsky, Grieg, and Debussy.

Little Girls' Frocks Show Effects of Recent Changes
EVEN though mother's fashions seem to absorb the spring spotlight, things are also happening on a diminutive scale in the mode. The first difficulty does not appear as a hairdresser of spring, nor, however, the first small frock or suit. Children's modes do not change radically from season to season as a rule, but the most frequent points which develop new interest. This spring, however, little girls' frocks show the effects of the recent changes in outer fashions. Here and there a waistline is noted as a decided departure from the classic frock which hangs from the shoulder. Cape shoulders, little boleros, and delightful feminine details indicate a subtle mimicking of more sophisticated styles.

Two charming little girls' dresses have been sketched here to illustrate one or two of the new trends. First a white linen frock cunningly dresses a flared skirt. The tiny shirt is split in front and piped in green. A green belt and green blocks hemmed in around the neck are gay touches.

A second frock introduces a covered shoulder effect by point of tabs in yellow decorated with green scalloped appliques. This green and yellow color scheme is carried out in the frock. A pale yellow handkerchief linen yoke has a scalloped border of sage green. The middle section is a pale green with the same sage green again. Tiny plaits on either side in front achieve the effect.

VERY young men having no new modes of fathers to turn to appear in much the same little suits which they have always worn. Some of our best young gentlemen who have started smartly resemble their suits to date frocks. In such cases they usually have the point of the frock for the blouse and a plain tone for the shorts. If the matching frock has a flared collar the suit looks a masculine version on the blouse.

The complete ensemble with its enticing colors can transform a boy into a dashing aristocrat. The small youngster shown here is demurely modeling the very latest one-piece model from Paris. It is a true affair of French novelty fabric that resembles a light poplin. Hand-made scallops and appliques on the sole decorations as belts a continually interesting costume.

Some delightful prints designed for children for children and judged at winners by some of the best artists in the country are available for spring frock and their gay styles may be substituted in the frock without danger of paling from the shock.

Colors in this group—blue, green, red, orchid, black and white. Sizes 16 and 18, 36 to 52—quite a size range at such a low price and in apron dresses. Seven styles not sketched. Four other floral prints and three others in polka dot prints. All have interesting touches such as heart-shaped pockets, waistline shirring, dainty insets, and the like. Some are sleeveless, others with elbow sleeves. But at 87c only for Thursday and Friday.

Mail or telephone orders filled—call RU 4-2500 until 9:30 P. M. Machine-made dress shop—with floor—also on sale on the street floor.

NOISELESS DOG SHOW OPENS THURSDAY

Boston will present on Thursday the first "noiseless" dog show in the history of dogdom.

In the Boston Garden for the last three days of this week, at the 18th annual dog show of the Eastern Dog Club of Boston, a new policy will be put in force. There will be no deafening choruses of bark and howl, no yelping and mournful singing.

The reason for this quietness is that all dogs will be kept in kennels in rooms "afraid of the main hall space, and will be brought into the floor for the judging.

We are trying to eliminate all disagreeable noises which so often accompany such shows," said President F. Jackson Smith. "Our show will also be one of the cleanest on record, especially as the prevailing system of the garden is nearly perfect."

Fully 50,000 people are expected to attend the show, with the high attendance on Washington's birthday. Among those coming from great distances to view this largest show ever staged in New England are two noted dog judges of England.

The cost of staging the show this year exceeded \$25,000, even before the hall is opened. This club, one of the smallest in the world, with its exclusive membership of 27, does not operate to make money, and hopes merely to clear expenses.

A total of \$10,000 in premiums will be awarded to winners from among the 1400 entries. The show is the second largest ever given in the United States and will feature the cream of New England prize winners.

There will be 106 English setters, 42 Irish setters and four Gordon. Among the great entries will be Willowbrook Peter, owned by Charles H. Tyler of Boston, judge.

Pointers came high this year with 18 actual dogs due to appear, including two of the best in the country. Hiredith J. P., owned by Fink at Maloney of Pittsburgh, and Red Road Dover, owned by Joseph Armstrong, Greenwich.

There will be 63 merry little cocker spaniels, fox terriers in great numbers and the little terrier that gets onto every Christmas card and other decoration because of its popularity.

Seventy-five of Boston's own breed, the cocky Boston terrier, will be on hand and as usual there will be stiff competition in this class.

Antique a Day

No. 27

A very unusual type of old New England room table is shown today. It is owned by Mrs. F. L. Peters of Waltham, who has had some interesting experience in the collection of early American pieces.

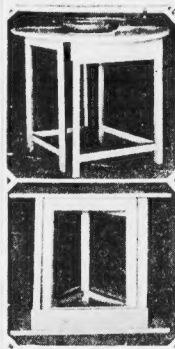

The table, which is over 120 years old, is shown in two positions. The upper view shows the two parts of the table joined so as to give the largest top surface. Resting on the table is an old pewter trencher of greater antiquity, which belonged to the same family. The lower view shows the two parts of the table folded together. Further details regarding this table will be discussed tomorrow.

The grandfather clock shown yesterday was invented and patented in 1856 by Benjamin Bowditch, assessor of Boston. Perhaps the fact of manufacturing hundreds of fine timepieces gave Bowditch the idea of swinging his pendulum on an almost frictionless knife-edge. The mechanism is run by weights and is controlled by a long pendulum. The face was painted by Charles Bulfinch, a Boston dial painter of the period, and it is as clean today as in the first years of its career. The clock was purchased from Bowditch by his former apprentice, Samuel Plympton. From him it was bought by Orono Jenkins, who sold it in turn to Charles W. Johnson of Newton Upper Falls. The fourth and present owner.

In connection with the Massachusetts Tercentenary Year, the Boston Evening American will publish from day to day interesting specimens of authentic antiques. Readers possessing genuine antiques, particularly articles of Colonial or early American origin or of historic association, are invited to forward photographs and records for publication. In case no photograph is available, the American will send one of its staff cameramen to photograph your antique if you live in Greater Boston. Material should be addressed to: *Antique Editor*, 3 Winthrop sq., Boston.

"Warmer Still" Is Weather Promise

With tonight's temperature at 31 today, the local weather bureau predicted warmer and cloudier tonight and tomorrow.

CHICAGO BEGINS RAISING FUNDS

CHICAGO, Feb. 19 (AP).—Boston tonight collected of the million necessary to raise the new financial establishment, began to be well on their way toward gathering a \$2,000,000 fund for the new operation until July 1.

St. H. Storer, head of the Chicago relief group, and Lemuel P. Meyer, philanthropic school teacher and representative of Mason William Hale Thompson, announced in business leaders who are said to pay 50 per cent of Chicago's need for a conference late today to open the drive.

The outcome of this conference was expected to determine whether or not the total of \$2,000,000 could be collected. If the sum falls short the fund will be apportioned between the various governments.

The domestic help problem is said to be getting a kinder treatment and the fund is expected to be in the \$1,000,000 range.

FRANCE'S COUP IN AIR STIRS GERMANS

By KARL H. VON MIEGAND Copyright, 1930, by Universal Service, Inc.

Berlin, Feb. 19.—A transatlantic air traffic monopoly between Europe and North and South America, via the Azores and Cape Verde Islands, alleged to have been acquired by France in a deal with Portugal is stirring German circles.

Unpublished Berlin state that the Portuguese government is expected to France in the guise of the Portuguese Air Traffic Co., a corporation for 50 years' exclusive right to fly from over or land on Portuguese territory. This corporation is said to include the Azores and Cape Verde.

As Portugal is one of the principal powers for either North or South America, flights and so in the present stage of aviation, it is charged that France has secured for herself a powerful monopoly of transatlantic plane traffic.

It is pointed out that the American monopoly at Lisbon has entered a strong protest. It is expected that this will be followed by similar protests from Germany, Spain and Italy.

Blind Senator Lays Success to His Wife

Washington, Feb. 19 (AP).—The story of a blind struggle against the handicap of blindness and of an effort to continue the practice of law through the assistance of his wife who related today by Senator Thomas D. Schall of Minnesota.

Speaking over the Columbia broadcasting system, Schall explained he lost his sight at the age of 29 from an electric shock and asserted that after being blind for 21 years he wouldn't trade the understanding he had gained for all the eyes in the world.

He said the first thing every blind man loses the right to think of is to go to work and that it is not easy for the "new and tender understanding of my brilliant life" to be replaced by the "darkness" of blindness.

He added that when he became blind he asked his wife if he should sell land, stocks and the result "I should say not, Tom. What's going to practice law? I sell as you go." You have your picture, in a short time, I am sure you can try a lawsuit as well with it. People will trust a blind man if he has the ability, just as quick as a man with sight.

So I went back to the practice of law, he continued, brooding, "I was then broke in debt and blind. It was a sorry road. I was named the Blind Senator."

He said the first thing every blind man loses the right to think of is to go to work and that it is not easy for the "new and tender understanding of my brilliant life" to be replaced by the "darkness" of blindness.

He added that when he became blind he asked his wife if he should sell land, stocks and the result "I should say not, Tom. What's going to practice law? I sell as you go." You have your picture, in a short time, I am sure you can try a lawsuit as well with it. People will trust a blind man if he has the ability, just as quick as a man with sight.

So I went back to the practice of law, he continued, brooding, "I was then broke in debt and blind. It was a sorry road. I was named the Blind Senator."

Modern Wiring Saves morning minutes.

MORNING minutes are extra-precious. But in the modern home, electric appliances have brought the breakfast cooking to the breakfast table, saving time-taking steps to the kitchen, and providing just the small extra margin of time that makes the difference between leisure and hurry.

All that your toaster, percolator, and grill require, to give you utmost usefulness, is a convenient place to plug them in—electric outlets within easy reach of the cords.

Electric outlets are comparatively inexpensive to add to your present wiring. Call your local electrician for an estimate.

Women are quick to find out

IT DOESN'T take women long these days to find out when something happens that is of real importance to their homes. And when that something concerns a food that they give their families 3 times a day, 365 days a year, they find out all the quicker.

The new Mother Hubbard Bread has become a subject of conversation, for women are really interested in this perfected loaf. They have often thought of such a loaf and wished they could buy it. And now they can—a loaf that in every important feature has been brought to the highest degree of perfection.

At your grocer's you will find this talked-of bread—Mother Hubbard, the perfected loaf.

WARD BAKING COMPANY

Tune in on the

TIP TOP CLUB

for a happy half hour of entertainment. You'll enjoy every minute of it. The TIP TOP CLUB is a regular Thursday evening feature on the Columbia Broadcasting System network.

DEALERS HOLD OPEN HOUSE SATURDAY

One of the first signs of spring in New England comes with the announcement of the annual open house held each year in Washington highway by the automobile dealers of Greater Boston. This year the holiday closes next Saturday and almost preparations are being made for a display of the latest models on that made by the great motor automobile show held each year in January. February 22 is one of the most important days in the year for local dealers in thousands of people flock to "Auto-tomb" row on this occasion to view the splendid showrooms and inspect the latest offerings in the motor world.

The general rule with a large majority of the dealers is to keep open house from 9 o'clock in the morning until 6 o'clock at night. There is music, and in many cases refreshments are served. Factors are also distributed. Last year every salesman there will be some special feature.

The tradition of having Washington highway showrooms open every year ago long before there were automobiles. Bicycle dealers, many of whom took up the tradition, held their annual open house on this holiday as the most accepted time for a showing of the new model bicycles. The opening became more and more important each year, and with the coming of the automobile it was continued, until now the tradition is firmly established in New England.

The real start of the spring and summer season in the automobile industry is over before this holiday showing will fulfill a greater function of introducing the new designs. It has been many years since the automobile industry has seen such great development in the last year. In almost every unit of the car and in almost every make some changes have been made. This year marks the introduction of the first V8 engine car to be put in production in the first year for the front wheel drive passenger cars.

Although the new cars present many mechanical improvements, the initiative factor in the new showrooms is likely to be most important in body design and coloring. It has been many years when manufacturers realize that people wanted automobiles to please the eye as well as to afford the desire to go somewhere. The first efforts were experimental, but year by year designers and colorists have felt after and after of themselves, and now, in 1930, they seem to know pretty definitely what to do and how to do it.

For one thing, the automobile of today is a unit. Not long ago the body of a car looked as if it had been added to the chassis as an afterthought. Now chassis and body appear to be made for each other. They are parts of a complete vehicle.

For instance, for instance, are included in the same scheme applied to the car as a whole.

Graham Protects Inside Surfaces

The inside surfaces of Graham cylinders are sprayed with a waterproof substance that prevents rusting and holds fast any particles of the mauling sand that might cling to the inside of the small water passages.

Tells How He Set New Records

Eddie Pullen, ex-champion dirt track and road pilot, at wheel of new 1930 Willys Six, tells George M. Graham, vice-president in charge of sales for Willys-Overland, how his mount came through in the second gear speed run from Los Angeles to San Diego for an average of 44.76 miles per hour.

Here's Another Record

Cars equipped with Chrysler's new 120-horsepower engine, which has been tested to travel 120,000,000 miles in 1929, the equivalent of six trips to the sun.

Essex Challenger Appeals to Women

The Essex Challenger is showing the new Essex Challenger to women prospects, says Carl Lyndholm, vice-president of the Herley-Kimball Co., Hudson-Essex distributor, "as we are delighted with their reception of it. The sales and desire of women have been a major consideration in its design and engineering from the blueprint to the last detail of execution."

Women on the engineering staff at the factory have contributed outstanding developments in the new Essex Challenger.

Expand Facilities at Franklin Plant

Thousands of dollars worth of new machinery has been installed in the Franklin factory at Syracuse during the last year in order to take over the manufacture of many individual parts purchased through vendors.

The movement gives greater control of material and inspection, and in expansion of the factory recently developed material has greatly reduced the cost of manufacture. L. J. Purdy, Franklin factory manager, declares: "Without such expansion with new production would have to be paid at a much higher price."

NEW TIRE GAUGE INVENTED BY BOSTON MAN

C. J. Manning of the Manning Gauge Co., Inc. of Boston has invented and patented a method by which a gauge may be attached to the stem of a tire by means of a flexible metal tube permanently installed on any part of the wheel.

When this device is attached to the valve stem, the air pressure is released from the tire, passes through the flexible tube and enters the gauge, showing the exact pressure in each tire.

It is possible to use it at a glance whether the driver is carrying the correct pressure recommended for tires.

It has no leather or rubber parts to deteriorate. Being constructed of all metal including the expansion element, the user is assured of dependable service.

Properly inflated tires make easier and less body wear and are less liable to puncture; they will travel twice as far as those over or under-inflated.

A new tire gauge, invented by C. J. Manning of the Manning Gauge Co. of Boston, can be attached to the stem of a tire

Editors' Hats Off to Oakland Eight

After the fastest "high-gear" ride that these three Seattle automobile editors had ever taken up the 10 per cent grade of Queen Anne Counterbalance Hill they doffed their hats to the New Oakland Eight.

WALKER SELLS 'Finger-Tip Control' in Willys-Overland

Two of the pioneers of the motor industry, organizations that were in existence in the days of the curved dash motor car, are now selling the new model Willys-Overland. Company, have joined forces in promoting the new model Willys-Overland.

W. J. Walker, who has been in the motor industry for 25 years, and W. J. Walker, who has been in the motor industry for 25 years, are now selling the new model Willys-Overland.

HUDSON WILL SHOW CARS

"We expect several hundred people to visit our showroom at 892 Beacon at an Washington's Birthday," says C. L. Nutter, general manager of the Herley-Kimball Co., "We will have on display several special Hudson and Essex show cars, finished in most attractive color combinations with upholstery and hardware to harmonize."

On the first and second floors will be every model of open and closed cars for 1930.

Hudson's Great Eight Sedan, a new body style by Hudson, is attracting considerable attention as a convertible two-passenger car. This type is also available in the Essex Challenger chassis.

Both the Hudson and the Essex will be of interest to every car owner. Demonstrations will be held at the factory of the public throughout the day.

FORD TRUCKS IMPROVED

The Ford Motor Company has announced many changes in the Model AA one-and-one-half-ton truck chassis.

Those improvements include, among others, the new four-speed transmission, new spiral bevel gear drive axles and stronger front axle and spring, larger tanks and provision for a power take-off. The entire chassis also has been strengthened.

Final rear wheels are optional equipment. These wheels are interchangeable. The same size tire is used on all six wheels with the result that only one spare need be carried. Instead of one of smaller size for front and one of larger and more expensive type for rear use.

The four-speed transmission furnishes ample road speed for rapid, efficient transportation, together with an improved low-speed pulling power. This improvement, together with the new four-speed transmission, supplies sufficient power for moving capacity loads out of pits and on soft ground.

The new rear axle is a special bevel gear three-quarter floating for the truck type. This allows for the entire weight of truck and load to be carried on the housing and permits the axle shafts to be used solely for driving the rear wheels.

Essex Challenger Appeals to Women

The Essex Challenger is showing the new Essex Challenger to women prospects, says Carl Lyndholm, vice-president of the Herley-Kimball Co., Hudson-Essex distributor, "as we are delighted with their reception of it. The sales and desire of women have been a major consideration in its design and engineering from the blueprint to the last detail of execution."

The Essex Challenger is showing the new Essex Challenger to women prospects, says Carl Lyndholm, vice-president of the Herley-Kimball Co., Hudson-Essex distributor, "as we are delighted with their reception of it. The sales and desire of women have been a major consideration in its design and engineering from the blueprint to the last detail of execution."

Women on the engineering staff at the factory have contributed outstanding developments in the new Essex Challenger.

Expand Facilities at Franklin Plant

Thousands of dollars worth of new machinery has been installed in the Franklin factory at Syracuse during the last year in order to take over the manufacture of many individual parts purchased through vendors.

The movement gives greater control of material and inspection, and in expansion of the factory recently developed material has greatly reduced the cost of manufacture. L. J. Purdy, Franklin factory manager, declares: "Without such expansion with new production would have to be paid at a much higher price."

NEW TIRE GAUGE INVENTED BY BOSTON MAN

C. J. Manning of the Manning Gauge Co., Inc. of Boston has invented and patented a method by which a gauge may be attached to the stem of a tire by means of a flexible metal tube permanently installed on any part of the wheel.

When this device is attached to the valve stem, the air pressure is released from the tire, passes through the flexible tube and enters the gauge, showing the exact pressure in each tire.

It is possible to use it at a glance whether the driver is carrying the correct pressure recommended for tires.

It has no leather or rubber parts to deteriorate. Being constructed of all metal including the expansion element, the user is assured of dependable service.

Properly inflated tires make easier and less body wear and are less liable to puncture; they will travel twice as far as those over or under-inflated.

A new tire gauge, invented by C. J. Manning of the Manning Gauge Co. of Boston, can be attached to the stem of a tire

Editors' Hats Off to Oakland Eight

After the fastest "high-gear" ride that these three Seattle automobile editors had ever taken up the 10 per cent grade of Queen Anne Counterbalance Hill they doffed their hats to the New Oakland Eight.

WALKER SELLS 'Finger-Tip Control' in Willys-Overland

Two of the pioneers of the motor industry, organizations that were in existence in the days of the curved dash motor car, are now selling the new model Willys-Overland. Company, have joined forces in promoting the new model Willys-Overland.

W. J. Walker, who has been in the motor industry for 25 years, and W. J. Walker, who has been in the motor industry for 25 years, are now selling the new model Willys-Overland.

HUDSON WILL SHOW CARS

"We expect several hundred people to visit our showroom at 892 Beacon at an Washington's Birthday," says C. L. Nutter, general manager of the Herley-Kimball Co., "We will have on display several special Hudson and Essex show cars, finished in most attractive color combinations with upholstery and hardware to harmonize."

On the first and second floors will be every model of open and closed cars for 1930.

Hudson's Great Eight Sedan, a new body style by Hudson, is attracting considerable attention as a convertible two-passenger car. This type is also available in the Essex Challenger chassis.

Both the Hudson and the Essex will be of interest to every car owner. Demonstrations will be held at the factory of the public throughout the day.

FORD TRUCKS IMPROVED

The Ford Motor Company has announced many changes in the Model AA one-and-one-half-ton truck chassis.

Those improvements include, among others, the new four-speed transmission, new spiral bevel gear drive axles and stronger front axle and spring, larger tanks and provision for a power take-off. The entire chassis also has been strengthened.

Final rear wheels are optional equipment. These wheels are interchangeable. The same size tire is used on all six wheels with the result that only one spare need be carried. Instead of one of smaller size for front and one of larger and more expensive type for rear use.

The four-speed transmission furnishes ample road speed for rapid, efficient transportation, together with an improved low-speed pulling power. This improvement, together with the new four-speed transmission, supplies sufficient power for moving capacity loads out of pits and on soft ground.

The new rear axle is a special bevel gear three-quarter floating for the truck type. This allows for the entire weight of truck and load to be carried on the housing and permits the axle shafts to be used solely for driving the rear wheels.

Essex Challenger Appeals to Women

The Essex Challenger is showing the new Essex Challenger to women prospects, says Carl Lyndholm, vice-president of the Herley-Kimball Co., Hudson-Essex distributor, "as we are delighted with their reception of it. The sales and desire of women have been a major consideration in its design and engineering from the blueprint to the last detail of execution."

White's Thrift Basement
R. H. WHITE Company

THE DOLLAR BILL comes into its own in White's Thrift Basement tomorrow! It's not the slightly scorned bill of least importance—it's not the bill that makes you murmur, "Only a dollar!"

The Dollar Bill on White's Thrift Basement's Dollar Day expands with pride—it accomplishes in some cases twice and three times as much as it can ordinarily! It becomes of Financial Importance! For instance, it swoops up 3 pairs of rayon bloomers! It gathers in 2 broadcloth shirts for men! It snatches up 2 smocks! It pounces upon 12 Turkish hand towels! It acquires a 6 piece cottage set! It is responsible for a frilly, lacy silk chemise or 4 uplift bandeaux! It sits a light on your desk . . . it puts a new brimmed straw hat on your head! It provides a little boy with two suits! It—well, it's almost endless—this list of things a Dollar Bill will do tomorrow, when it makes brand new acquaintances in a grand, hail-fellow-well-met manner!

Because you're a Wise Woman, you're going to be on the corner of Harrison Avenue and Bedford Street, or at the corner of Washington and Bedford, or at the Washington street entrance, when the Thrift Basement opens tomorrow morning!

White's Thrift Basement

WHICH of these two women has maids to do all her work?

TWO WOMEN with perfectly lovely hands . . . wouldn't you think from the actual photograph, above, that they were both wealthy women?

Yet number 1 does all her own work . . . number 2 has maids . . . never enters the kitchen!

The clever young housewife knows the secret of hands that look lovely as those of the woman of leisure . . . she simply uses Lux . . . for dishes and all soap and water tasks.

Modern homemakers, by the thousand, are now keeping their hands white and smooth and young this easy way.

They discovered for themselves . . . in washing out their fine things . . . how perfectly lovely Lux leaves the hands . . . then began using Lux for dishes and all household washing and cleaning tasks.

So many soaps dry up the precious oils of the skin . . . leave hands red and rough and work-worn . . . "dishpan hands." But pure, bland Lux suds protect the beauty oils and keep the skin smooth and fine.

Save the flower-like beauty of your hands! It costs so little to give them hearty care with Lux. Lux for all your dishes costs less than 1¢ a day!

305 Famous Beauty Shops Say:
"We cannot distinguish between the hands of the woman with maids to do all her work and the hands of the woman who uses Lux. Lux gives the hands actual beauty care."

LUX
The surest beauty care known—LUX for washing your dishes

Lovely Hands for less than 1¢ a day . . . LUX for Dishes!

How a Girl Helped Her Affianced in His Business

By HELEN KLUMPH
From Marion Davis' forthcoming book, "Daisy's Story," a story of a girl who helped her affianced in his business.

CHAPTER I
Daisy fairly danced with glee as she approached the living room, pausing at the threshold to drop one last look on the door.

Anyone else would have been crushed by the appearance of the staid, solemn faces before her, but Daisy, she beamed at the gloomy circle as she stepped into the room.

"Now," she called out cheerily, "is everybody ready?"
"Here you have all the audience in the great pearl robbery," she crossed the room and dangled a wisp of feather before Mr. Forbes. "This was found on the suspect and it is the only clue. Now let's see what good detective you are."

"Oh, now come Mr. Forbes. I just know you're a regular Sherlock Holmes. You can play first. And after you've looked for a long time if you don't find them—oh, but I know you will." Forbes would rather have done anything at that moment or at any moment—than to join in any game suggested by Daisy. He loathed games and he loathed this chattering spirit who was always thinking up something to make a guest miserable. But Angela's pearls were at stake. He must find them at once and see that they were in safe keeping. He would never let her wear them again until she had sense enough to hang onto them.

Anyway, he decided philosophically as he stammered out in the hall, he would at least escape from Daisy's continual conversation for a while.
He had hardly started up the stairs when Daisy started up the stairs. Gordon decided that he could stand no more. Taking the arm of the ever sympathetic Van Dyke, he headed for the kitchen.

There was a peaceful scene compared to the rest of the house. They found a table set with bottles and glasses and sparkling and sipping. The kitchen table enjoyed a long silence.
After a long pause, Van Dyke, who had been sitting at the table, looked up and said, "Gordon, I've been thinking about you a great deal lately. You seem to be in a great deal of trouble. I hope you'll let me know what it is. I'll do all I can to help you."

In the living room, there was great confusion, a merry confusion, all over the place at once. "What's the matter?" asked Daisy, who had been sitting at the table. "What's the matter?" asked Daisy, who had been sitting at the table. "What's the matter?" asked Daisy, who had been sitting at the table.

"What's the matter?" asked Daisy, who had been sitting at the table. "What's the matter?" asked Daisy, who had been sitting at the table. "What's the matter?" asked Daisy, who had been sitting at the table.

"What's the matter?" asked Daisy, who had been sitting at the table. "What's the matter?" asked Daisy, who had been sitting at the table. "What's the matter?" asked Daisy, who had been sitting at the table.

SKETCHES ON SOUTH-EAST RAILROAD

Legislative Committee Wants to See Cash Before Taking Action on Project

There is a possibility that the South-East Railroad project will be abandoned, according to a report from the Legislative Committee. The committee is currently reviewing the project and has expressed concerns about the financial viability of the plan.

It is understood that the committee is looking for more concrete evidence of the project's success before making a final decision. The project has faced several challenges, including funding issues and logistical problems.

The committee's decision will have significant implications for the project. If the project is abandoned, it would be a major setback for the region. The committee is expected to make a decision in the near future.

The project has been a topic of debate for some time. While some see it as a necessary investment in the region's infrastructure, others are concerned about the costs and potential risks.

The committee's decision will be closely watched by all parties involved in the project. It is hoped that a fair and informed decision will be reached.

The project has the potential to bring significant benefits to the region. It would improve transportation and create jobs. However, it is essential that the project is managed carefully to avoid any negative impacts.

Reproductions of Egyptian Tomb Paintings Now at Art Museum

This is one of the largest of the collection of Egyptian tomb paintings which are on exhibition at the Museum of Fine Arts until March 16. This fishing and fowling scene was copied by Nina de G. Davies from the wall painting of the tomb of Menekas, at Thebes, XVIII dynasty. These paintings are reproduced by courtesy of the Metropolitan Museum of Fine Arts which loaned the collection to the Boston Museum.

Egyptian Art Classics Exhibited at Museum

An exhibition of Egyptian tomb paintings is now on display at the Museum of Fine Arts. The exhibition features a variety of classic works, including scenes of daily life, religious rituals, and mythological figures.

The exhibition is a collaboration between the Museum of Fine Arts and the Metropolitan Museum of Fine Arts. It provides a unique opportunity for Boston residents to view these ancient masterpieces.

The exhibition is open to the public from 10:00 AM to 5:00 PM. Admission is free. For more information, please contact the Museum of Fine Arts.

The exhibition is a must-see for anyone interested in ancient Egyptian art. It is a testament to the skill and creativity of the ancient Egyptians.

The exhibition is a rare opportunity to see these ancient masterpieces. It is a chance to learn more about the culture and history of ancient Egypt.

\$16 TAX LIMIT FOR CITY URGED

A \$16 tax limit for the city of Boston is being urged by the local business community. They argue that a higher limit would be unfair to small businesses and would increase the burden on taxpayers.

The city has proposed a new tax limit, but the business community is concerned that it would be too high. They are calling for a more reasonable limit that would be fair to all businesses.

The city is currently in the process of reviewing the proposed limit. They are taking public comments into account and are working to find a solution that is fair to everyone.

The city is committed to finding a fair and equitable solution. They are working hard to ensure that the tax system is fair to all businesses and taxpayers.

The city is committed to transparency and accountability. They are providing regular updates on the progress of the review and are open to public input.

Jury Frees Autoist Who Fights Own Case

A jury has found an autoist not guilty of a charge of driving without a license. The autoist had fought his own case, and the jury was convinced by his defense that he was not guilty.

The autoist's defense was based on the fact that he had a valid license at the time of the incident. The jury found that the prosecution had not proven their case beyond a reasonable doubt.

The autoist is now free to go. The case has been a landmark decision for the city, as it sets a precedent for how such cases should be handled.

The city is pleased with the outcome of the case. It shows that the justice system is working as intended and that innocent people are being acquitted.

The city is committed to ensuring that the justice system is fair and equitable. It is working to improve the process and to ensure that all cases are handled properly.

LAW BACKED BY STATE OFFICIALS

Doctors Also Support Measure Designed to Protect Society

A new law designed to protect society is being backed by state officials and doctors. The law is intended to address a specific issue and to ensure that the public is protected.

The law is a result of a long and difficult process. It has been reviewed and approved by state officials and doctors, who are confident that it will be effective.

The law is a testament to the commitment of state officials and doctors to the public. It shows that they are working hard to protect the health and safety of the community.

The law is a positive step towards a safer and healthier society. It is a sign that the government is taking its responsibilities seriously.

The law is a model for other states. It shows how a law can be developed and implemented in a way that is fair and effective.

The law is a source of pride for the state. It is a sign that the state is committed to the well-being of its citizens.

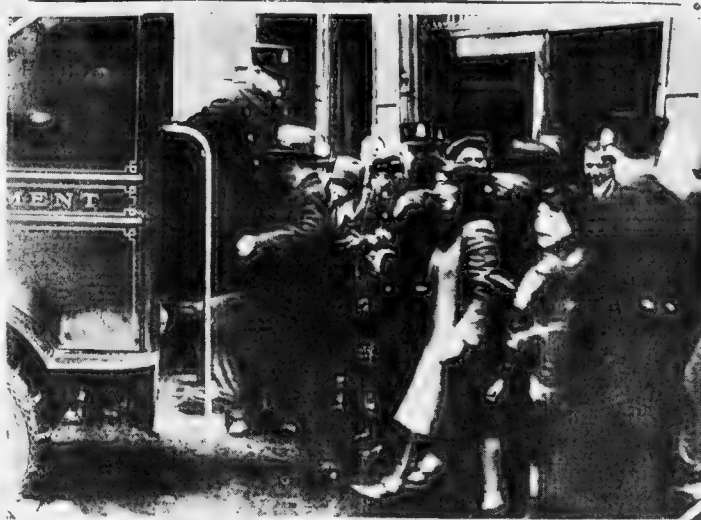

TWO RESCUED, 7 OTHERS FLEE FIRES IN REEVE AND LEXINGTON

WOMEN AND CHILDREN ESCAPE

Man Is Carried Down Ladder From Roof of Home as the Flames Nearly Trap Him

The fire broke out in the rear of the home of Mrs. William A. Reeves, 121 Lexington street, at about 10:30 p. m. Tuesday night. The fire was caused by a gas stove which had been left burning. The flames spread rapidly and soon the entire rear of the house was in flames. The firemen arrived at the scene at about 11:15 p. m. and worked for some time to contain the fire. The fire was finally extinguished at about 12:30 a. m. The damage to the property was estimated at \$10,000. The fire was caused by a gas stove which had been left burning. The flames spread rapidly and soon the entire rear of the house was in flames. The firemen arrived at the scene at about 11:15 p. m. and worked for some time to contain the fire. The fire was finally extinguished at about 12:30 a. m. The damage to the property was estimated at \$10,000.

Garment Strikers on Their Way to Lockup

Twelve persons arrested in Kneeland st., South End, today, in connection with garment makers' strike, were booked on various charges, most of them accused of blocking traffic and

All-Bruin Hockey Game at End of Season Proposed

PHIL SCOTT, IN EXCLUSIVE PHOTO INTERVIEW, SHOWS HOW HE WILL K. O. JACK SHARKEY

LEFT HOOK TO JAW

RIGHT TO HEART

RIGHT HAND UPPERCUT

Now that Sharkey has told how he will k. o. Scott at Miami next week, Scott returns the compliment. In these exclusive International Newsreel photos, Jack De Mave posing as Sharkey, Scott tells his story. First, Phil will hit Jack's head with a left hook to the jaw. Next—

Phil will get under Sharkey's left and send a terrific right to the liver. This is just what Sharkey said he would do to Phil. In Scott's words, "I'll land the 'terrible right' before Sharkey does. Those first two punches, Scott figures, will prepare Sharkey for a merciless k. o."

Then—a right hand uppercut. Phil won't have any A to mark where Sharkey will fall, but he's sure the Hub sailor will go out. The hand will play "Brittany" and the "ring" as the victorious Scott goes to Sharkey's corner to offer him condolences and a cup of tea. However—we'll see who's right next Thursday.

ALL-BRUIN TILT ASKED

By BILL GRIMES
Recently President C. F. Adams received an appeal from a hockey fan that at the end of the season, the Bruins be divided into two squads and play regular ones at the Boston Garden.

Since the opening of the present season, there has been considerable discussion over the ability of the different combinations used by Manager Art Ross this season. Naturally, the fans have been favorably toward the greatest scoring unit, the "Big Three"—Connery, Land, and Dutch Gahmer, while others have set up the claims that Harry Oliver, Marty Barry, and Perk Galt have been invaluable to Boston.

In all probability, an all-Bruin game would pack the Garden. The entire hockey the Bruins have displayed this season has made them the greatest drawing card in the game. And, naturally, there is no place in the large arena for as fine an attraction as all-Bruin.

An opportunity to see Tim Thompson endeavoring to stop a famous Verducci "tip" would be a real treat. What a thrill would be offered when George Owen stepped out to check Phil Scott in the big defense star descended down the length of the Garden surface on one of his dynamic rushes. Then, too, it would be interesting to watch Harry Oliver, Marty Barry and Perk Galt, with their way through the "Cambridge" defense, Eddie Shore and Lionel Hitchman.

Schaaf May Be Picked Alternate at Miami

ERNE SCHAAF, hard-punching Hub sailor, faces the opportunity of breaking into the spotlight at Miami, together with other leading heavyweight contenders. If he is successful in defeating K. O. Christner, the Akron, O. giant, at Mechanics Building, Friday night for the Argonne A. A.

A victory for Schaaf will mean that the Hub heavyweight will be selected as an alternate to be prepared to step into the breach if anybody on the Miami card is unable to secure the bout. It is understood that Phil Schaefer, manager of Schaaf, already has accepted the offer received recently and he has made reservations to make the trip to Miami along with Schaaf on the Atlantic Coast Line, which departs from South Station early Saturday afternoon.

Christner, however, who has been training in the Hub for the past two days, insists that he will not only win from Schaaf but will win by a knockout. Christner, one of the most dangerous punching heavyweights in the game today, is out to make it short and sweet in this second meeting with the Hub sailor. Schaaf, who has been traveling on both in recent bouts, insists that the defeat at the hands of Christner in their first meeting was caused by a broken bone in his right hand, which was possible for him to punch with that hand after the fourth round of the bout.

Supper after the heavyweight bout at Labor Day was a banquet of the kind which the famous Harry Devine of Worcester and Pancho Villa of New Bedford, who shared the throng at the opening Argonne show, will meet in a return bout. In a second bout Jimmy Rogers of Cambridge looks

HARVARD GRID STAFF NAMED
